

SOLUTIONS FOR YOUR AEROSPACE NEEDS.

HISTORY OF THE HABA GROUP

THE STRENGTHS OF THE HABA GROUP

... will be beneficial to you if you are looking for an optimal solution for your material, processing, procurement or capacity problem! More than 7'000 customers already fully rely on the HABA quality because we keep our promises.

For HABA, the main focus is your long-term success. Our employees in all the European subsidiaries work together for your every day needs. Thanks to a wide range of materials, an extensive warehouse of more than 4'000 tonnes, our extremely flexible machine capacities and a extensive network of partners, with us you are always at the right address, even when it is urgent.

Reliability is the critical basis for a successful long-term cooperation.

YOUR ADVANTAGE WITH HABA AEROSPACE

... is more than 50 years of experience in processing, storage, and just-in-time deliveries of steel and aluminium plates, round bars, sheets and components. Our flexibility, speed and competence are our trade marks. Use our experience as a general contractor and use your released capacities to expand your core business.

Thanks to a large network of suppliers and partners, HABA has almost unlimited capacities as well as access to special work processes (NADCAP).

With HABA, you are entering into a relationship based on true partnership.

PROCESSES AT HABA AEROSPACE

YOUR BEST SOLUTION

HABA AEROSPACE is always at your disposal as a reliable partner in finding solutions - and as your contact for all of your requirements.

Thanks to our professionalism, experience and access to an internal team of experts, we can support you with any problem. Whether you're dealing with a procurement problem with sophisticated SCM; a production problem that you can't solve yourself; you can't purchase or manufacture large dimensions or special materials yourself; you have insufficient storage space or a logistical challenge with just-in-time requirements; together we'll find the best solution.

PROCUREMENT / STORAGE

Thanks to our worldwide network of suppliers, we also supply customised materials, in addition to the materials on stock, according to the required norms and standards.

After a well-documented incoming goods inspection, your products are optimally stored that, in addition to seamless traceability, a punctual delivery in the correct batch size is possible directly into your production process.

Thanks to optimised material management, corresponding scaling effects and a reduced on-site storage at your location, the overall costs can be significantly reduced in many cases.

Sheets Format 1250 x 2500 mm

2024	3.1364	(clad) T351	WL, ABS, AIMS, DIN, LN
6061	3.3214	T4	WL, ABS, AIMS, ASTM, AMS, QQA

Plates Format 1250 x 2500 mm | 1520 x 3020 mm

2024	3.1354	T351	WL, AMS, ANSI, ABS, DAN, LN, QQA
6061	3.3214	T651	WL, AMS, ANSI, DAN, LN
7050	3.3214	T7451	WL, AMS, ANSI, DAN, IPS
7175	3.4364	T7351	WL, AMS, ANSI, DAN, IPS, ABS, AIR, LN, PREN, QQA

Round bars Length 3000 mm

2024	3.1354	T3511	WL, AMS, DIN, LN, LAT, QQA
6061	3.3214	T6511	WL, AMS, DIN, LN, QQA
7075	3.4364	T73511	WL, AMS, DIN, LAT, QQA

Special materials

Titanium, magnesium and different steels

We also procure and store customer-specific materials according to your requirements.

CUTTING OF SEMI-FINISHED PRODUCTS

With the HABA machinery, designed for large dimensions, we can handle many of your production requirements in our own facilities. Save time and money. We mill your wrought plate to any desired final thickness with a tolerance of up to ± 0.05 mm and then foil it to protect the surface. We cut your blanks partially automatically with our modern circular saws to a tolerance of ± 0.1 mm up to a length of 5.3 m. Depending on alloy and condition, and if the standard allows, we can tailor your blanks to your desired flatness. If we have the corresponding raw materials in stock, we are able to deliver it to you within 24 hours thanks to the highest flexibility of all involved parties.

DRAWING PARTS

You don't have the necessary capacity or the right production process? You'd like to outsource parts of the project for a certain deadline / cost / technical or security reason? HABA is your reliable partner for all your needs as a so-called „general contractor“. In addition to our own production expertise, we have access to a large network in a wide range of disciplines which therefore results in almost unlimited capacity. No matter what production processes are involved, we select those partners who can deliver the best results in terms of quality, deadline and costs for your specific requirement. As your direct contact person, we monitor the entire processing until the finished product is delivered to your location on time.

ASSEMBLY / INSTALLATION

The greatest potential for improvements in terms of technology, costs and deadlines is the optimisation of interfaces. HABA has expertise in the entire value chain from raw material to ready-to-install components and assembly.

When it comes to winning orders and projects, it is often impossible to increase the required capacity fast enough, because the deadlines are usually too optimistic. Use the resources of the HABA Group and outsource complete tasks to us, including the responsibility for quality, costs and deadlines.

As your partner, we make every effort to optimise the processes and interfaces so that you reach your target and the desired customer satisfaction.

HABA Q-MANAGEMENT EN9100

We are EN9100 certified to provide you with more performance than the usual service providers.

The HABA QMS is an integral part of our understanding of quality manufacturing, the processes and our customer relationship.

Only what is measured can be improved. For this reason, HABA is constantly measuring and evaluating customer satisfaction, deadline accuracy, deviations or continuous improvement processes (CIP). So that we become even more competent and attractive to you.

HABA LOGISTICS

Thanks to the experience of over 70,000 deliveries per year throughout the HABA Group, you can rest assured that your product is in the right place at the right time with the highest quality.

HABA will be happy to meet your requirements and adapt processes and packaging to your specific needs - whether it is with markings, encodings, just in time deliveries, storage of customer materials or anything else. Challenge HABA! Our export department fulfils all aspects of international order processing, including export packaging and customs formalities.

HABA offers a worldwide distribution of consignments, which can be retraced at any time due to the EN9100 Aerospace certification.
